Economics undergraduate with a strong interest in market analysis and data interpretation. Proficient in R, Python and C, with practical experience using Excel and Power BI to turn data into clear, decision-oriented insights. Team-oriented, responsible and organised, with these qualities strengthened through scouting and volunteer work.

Skills

Econometric analysis in R • Statistical data processing and interpretation • Excel for quantitative analysis • Power BI dashboards and visualisation • Economic research • Critical thinking • Teamwork • Problem solving • English B1

Education

2023 - PRESENT

Bachelor's Degree in Economics, University of Beira Interior

Projects

2026 - MARKET POWER AND PRICING DYNAMICS IN A DIGITAL MARKETPLACE

- Produced an economic research report examining platform market power, price formation, supply, demand and market shocks.
- Collected and processed historical price data in R to assess volatility and the pricing effects of changes in market structure.

Additional Training

2024 - Data Visualisation for Decision-Making

- Analysed and processed information using Excel.
- Built dashboards and visualisations in Power BI.
- Applied metrics and indicators to support decision-making.
- Developed quantitative and data interpretation skills.

2024 - Occupational Health and Risk Prevention

- Studied work-time management principles and productivity.
- Examined fatigue-related risk factors and work organisation.
- Reviewed regulatory context and prevention best practices.
